

## *Remote Alarm Verification*

### *An Instant Security Presence Any Time, Anywhere*

**Alarm verification gives you the shortest possible response time when an incident occurs. Our remote monitoring center activates cameras, scans premises and parking lots for unauthorised activity and potential threats, advises status and can deliver an audible message that security is monitoring in real-time.**

With remote alarm verification, a live video feed instantly puts an operator on the scene. While authorities are on their way operators can give them critical real-time updates as the situation unfolds.

Top Security supplements intrusion alarm monitoring with Remote Guarding to verify the cause of the activity. False alarms are reported to your emergency contact. Top Security Mobile officers and/or police are dispatched when intrusions are verified.

## Advantages of Remote Alarm Verification:

- On-demand response to alarm activations
- Reduces costly false alarm fees imposed by local jurisdictions
- Cost-effective even if you have many sites in remote locations
- Access to cutting edge technology with no new major investment
- Part of a comprehensive service portfolio

### Partner network brings together industry's best

Top Security has global agreements with some of the security industry's top innovators. This allows us to deliver the best possible technology and services in simple, cost-effective packages.

### A knowledge leader in security

Remote Guarding, managed by Top Security, gives you state-of-the-art security in innovative and cost-effective packages. Cutting edge cameras and software create real-time security that helps prevent incidents, optimises security officers' time and reduces costs. Top Security can design, install and maintain the technology equipment used for this service.

Top Security offers a broad range of services that include specialised guarding, technology solutions, mobile guarding and corporate risk management; we customise offerings that are suited to the individual customer's needs. From small businesses to large corporations, our employees make a difference every day.

## How Remote Alarm Verification Works:

- Expert consultation to find best camera locations and angles
- Cameras and software connect to a 24/7 monitoring center
- Highly trained professionals remotely respond to alarm activations at your facility to determine the cause
- Response can include audio for live intervention
- Evidence is documented if an incident occurs
- Open platforms allow existing equipment to be utilised — often in combination with cutting edge technology
