**Information**

- ▶ An alarm system activates and a signal is sent to the Central Monitoring Station.
- ▶ The Monitoring Station receives a signal and the customer's details automatically flash on the screen within seconds.
- ▶ The method of signalling automatically tells the controller the nature of the alarm i.e. burglary, fire, personal attack etc.
- ▶ To eliminate false alarms the controller may telephone your premises. Should an incorrect passcode be given or no reply received, it will be treated as an emergency.

- ▶ A controller immediately acts on your behalf notifying the Gardaí, keyholders and other relevant emergency services.
- ▶ All information in respect of the activation and subsequent actions taken are recorded on a real time basis. This information can be recalled at any time.
